

Panel Cleaning Instructions

FINGER PRINTS & INSTALLATION MARKS:

During Installation: Use a cut out piece of tile, face to face, rubbing gently until dirt disappears. If a mark is particularly deep or dark, a lightly moistened microfiber sponge should be used. During Maintenance: A lightly moistened microfiber sponge should be used.

VENT DIRT:

The dirty area may be lightly vacuumed. If additional cleaning is needed, microfiber sponge should be used. Wipe gently. For best results, replace the vent filters regularly.
